FOR HEALTHCARE PROFESSIONALS

Prescribable Devices for Vibration Therapy

FDA-registered Class II vibration devices for Pelvic Floor Care

FEMALE PELVIC FLOOR THERAPY

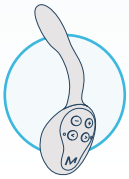

Crescendo 2
Ultra-flexible vibrating device that delivers tailored, targeted stimulation for pelvic wellness, arousal & lubrication.

Poco
Compact, bendable vibrating device that delivers tailored, targeted stimulation for pelvic wellness, arousal & lubrication.

Legato
External vibrating device that delivers 360° stimulation to the labia and vulva for genital wellness, arousal & lubrication.

Molto
An ultra-slim, body-adaptable vibrating device designed to deliver precise stimulation to the pelvic floor or vagina.

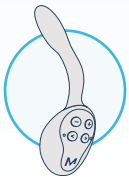

MALE PELVIC FLOOR THERAPY

Tenuto 2
Wearable vibrating device that stretches and adapts around the penis and on the perineum, supporting penile firmness and erection quality.

Tenuto Mini
Compact, wearable vibrating device that fits around the penis, supporting penile firmness and erection quality.

Molto
An ultra-slim, body-adaptable vibrating device designed to deliver precise stimulation to the anus, prostate or pelvic floor.

Two ways a practice can offer MV.Health devices: Insurance-billed and Cash-pay.

INSURANCE / RTM MODEL

Prescribe & bill monitoring

For patients, whose payer reimburses remote therapeutic monitoring (RTM).

1. Buy the device at wholesale price, direct from us at MV.Health.
2. Prescribe & supply the device to the patient for at-home use, RTM App logs patient usage.
3. Bill CPT 98977 + 98980 for the monitoring your practice provides.

$1,000 typical Year-1 RTM reimbursement / patient.

CASH-PAY MODEL

Stock & dispense in clinic

For self-pay patients and practices that want zero billing overhead.

1. Buy the device at wholesale price, direct from us at MV.Health.
2. Sell the device to the patient at the suggested retail selling price.
3. Patient leaves their appointment with at-home therapy & device - no claims, no paperwork.

$75+ per each device sale for the practice.

250,000 Patients

60+ Awards

25+ Clinical Studies

15-minute office / virtual demo sessions.

FOR HEALTHCARE PROFESSIONALS

Prescribable Devices for Vibration Therapy

Clinical Research

The following publications are independent, third-party research studies evaluating the efficacy of MV.Health devices in addressing various sexual dysfunctions.

Crescendo 2

Multicenter Study on the Use of a New Device for the Treatment of Genito Pelvic Pain Disorders

5X improvement in pain score over 12 weeks — significant gain in the FSFI sexual-pain domain, with no adverse effects.

Tenuto 2

Penile Rehabilitation using Tenuto 2 after Prostatectomy

6-month study: IIEF improved from an average of 11 to 19 post-radical prostatectomy; patients preferred Tenuto 2 to traditional methods.

Poco

Vibrational Intervention for Sexual and Pelvic Health (RCT)

8-week RCT (81 women): significantly higher total FSFI vs control (22.2 vs 16.3); 35% reached normal FSFI, with improved arousal, lubrication, orgasm & pain.

Tenuto Mini

Safety and Preliminary Outcomes of a Vibrating Constriction Ring for Psychogenic Erectile Dysfunction

79% improvement in erectile function over 8 weeks with Tenuto Mini in psychogenic ED, applicable even when couple-based therapy or medication is not feasible.

Legato

Treatment of FSAD using a Pattern of Focused Mechanical Vibration

83% improvement in Arousal and 4X in Lubrication over 8 weeks in women with arousal & lubrication issues.

Molto

Molto Device for Chronic Non-bacterial Prostatitis

Pain scores decreased from 7/10 to 3/10 over 3 months in refractory prostatitis, with no adverse events; erectile function & satisfaction also improved.
